

BEBE

Time to go electric ⚡

**WE WILL SAVE YOU 1M MONTHLY
FOR EVERY 10 7T TRUCKS
7TGW**

*Projections based on current
costs, 5000kms and our
recommended charging
infrastructure*

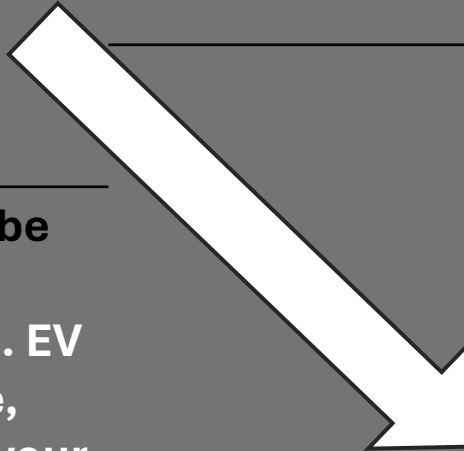

REBUILDING YOUR FLEET EFFICIENCY

FLEET EFFICIENCY

The Current Reality

High operational costs drop your profit every single day due to mechanical and manual inefficiencies of fuel-based platforms.

From
90/= per KM

The Shift to UtuBebe
From Invisible to driving your future. EV Trucks are reliable, efficient and seal your logistical nightmares.

To
72/= per KM

YOUR COSTS TODAY (5,000kms)

7-Ton Truck
Baseline: KES
250,000 (Rental or
Ownership costs)

Fuel Expenses:
KES 208,000
(Based on 5,000
KM @ 6KM/L)

**Total
Monthly
Spend :**

**KES
458,000
per truck**

! OPERATION LEAKS

Profit isn't just lost in fuel; it's lost in friction

- **Fuel Theft:** Significant losses from siphoning and lack of transparency
- **Drive-Chain Maintenance:** High service costs for traditional combustion engines
- **Tracking Gaps:** Inefficient fleet management and lack of data
- **Dirty Fuel:** Low-quality diesel damaging long-term engine health

UTU BEBE: YOUR #1 SOLUTION

- **Fixed Rate:** KES 72/- per KM

- **Operational Range:** 5,000 KM Monthly

- **Immediate ROI**

- **New Monthly Total:** KES 360,000

- **Optimized Drive-Chain**

- **Predictive**

- **Real-time Monitoring**

FOR EVERY 10 TRUCKS....

The Fleet Comparison

- ✓ Current Monthly Fleet Cost: KES 4.5 Million (Diesel Baseline).
- ✓ Utu Bebe Monthly Fleet Cost: KES 3.25 Million (Electric Service).
- ✓ Net Monthly Savings: KES 1.25 Million.
- ✓ Net Annual Savings: KES 12.5 Million.

Why the Savings are Guaranteed (Eliminating Waste)

- ✓ Zero Fuel Leakage:
- ✓ Predictable Maintenance:
- ✓ 24/7 Fleet Visibility: UtuBebe trucks provide constant data.
- ✓ First-Mover Advantage:

The Bottom Line

Replacing every operational problem with a financial solution.

PHASED DEPLOYMENT TIMELINE

Pre—Qualifications - Pe-Deployment - Deployment - Post- Deployment

Vehicle Model (GVW)	Est Range (Fully Loaded)	Rate per KM (KES)	Rate per KM (USD)
7 Ton Truck	300 KM	KES 72	\$ 0.56
10 Ton Truck	250 KM	KES 79	\$ 0.68
18 Ton Truck	200 KM	KES 85	\$ 0.81

Terms and Conditions apply excluding Driver and VAT

1. THE PRE-QUALIFICATIONS PHASE

2-4 WEEKS

NDA/LOI Execution: Formalizing partnership and confidentiality.

Test Truck Trial: Optional deployment of a spec-configured vehicle for customer verification.

Engineering Assessment: technical audit of charging needs and backup support configuration.

Route Identification: Mapping logistical flows for EV optimization.

2. THE PRE-DEPLOYMENT PHASE

SITE INFRASTRUCTURE

Physical setup of charging site and securing critical **KPLC approvals** for dedicated high-power lines.

DRIVER ONBOARDING:

Comprehensive **Driver Accreditation** and training program to ensure energy-efficient operation and safety.

3. THE DEPLOYMENT PHASE

1-3 MONTH FULLFILLMENT

Assembly Allocation: Dedication of manufacturing slots for the fleet batch

Body Building: Specialized construction.

Final Inspection:

Rigorous 360-degree technical and safety validation.

Fleet Delivery:

Handover and live operational deployment.

4. THE POST-DEPLOYMENT PHASE

WEEKLY PERFORMANCE REVIEWS

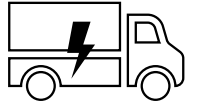

Constant optimization of driver performance, turnaround times, and charging schedules.

FLEET EXPANSION

Evaluation of charging status and site expansion to support growing logistical demands.
